Print with Mobility Print on Android

Step 1 - Download & Install the Software

- On your Android device, open a browser and go to the official link:
  http://mps-prnt-p1.ad.utah.edu:9163/client-setup/known-host/android.html

- Tap the link provided on that page to be redirected to the correct version of the Mobility Print app on the Google Play Store. Make sure you are on a campus network or VPN when using Mobility Print.

- **Important:** Do not search and install "Mobility Print" directly from the Play Store. You must use the link from the page above (our setup page), as it includes pre-configured settings specific to the University of Utah system.

- Download and install the Mobility Print app by PaperCut Software

Step 2 - Launch & Configure

- Open the Mobility Print app on your device. Make sure to use a campus network or VPN when using this app

- When prompted, allow necessary permissions (e.g., network access, printing access, battery saver etc.)

- The app will search for available printers. Select: RedPrintMobilityPrint[MPS-PRNT-P1]

- When asked for credentials:

  Username: Your UNID (e.g., U1234567)

  Password: Your CIS password

- The printer will now be added to your available printer list.

Step 3 - Print your Document

- Open the document, email, or webpage you wish to print.

- Tap the Share or Menu button, then select Print.

- Under Printer Selection, choose: RedPrintMobilityPrint[MPS-PRNT-P1]

Important:

- Before printing, tap on Paper Size and make sure to select either Letter (8.5"x11") or 11"x17". Other paper sizes like A4 are not supported and may result in failed jobs.

- If prompted, enter your credentials again.

- Tap Print to send the job to the RedPrint system.

- Use the instructions on the following pages to badge into the copier and release the print job.
